

Frontend & User Experience

Tag	Purpose / Target Area
[UI]	User Interface components, layouts, visual updates
[UX]	User experience improvements, interaction flows, usability
[CSS]	Styling, Tailwind, Sass, design system tokens
[A11Y]	Accessibility compliance (WCAG, ARIA labels, screen readers)
[STATE]	Frontend state management (Redux, Zustand, Pinia, React Query)
[I18N]	Internationalization, localization, translation keys
[ANIM]	Animations, micro-interactions, canvas/WebGL work

Backend & Business Logic

Tag	Purpose / Target Area
[API]	REST/GraphQL/gRPC endpoints, routing, controllers
[AUTH]	Authentication, authorization, OAuth, JWT, permissions
[BIZ]	Core domain/business logic, business rules, workflows
[QUEUE]	Background jobs, message brokers (RabbitMQ, Kafka, BullMQ)
[CACHE]	Caching layers (Redis, Memcached, in-memory strategies)

Tag	Purpose / Target Area
[WS]	WebSockets, WebRTC, real-time event streaming
[SDK]	Internal or external API client/wrapper libraries

Databases & Persistence

Tag	Purpose / Target Area
[DB]	Database modifications, queries, indexes
[MIGR]	Database migrations, schema versioning
[SCHEMA]	Data modeling, DTOs, database definitions
[QUERY]	Query optimization, SQL tuning, indexing fixes
[ETL]	Data pipelines, batch processing, data transformations
[ORM]	Object-Relational Mapping configurations (Prisma, TypeORM)

Infrastructure, Cloud & DevOps

Tag	Purpose / Target Area
[INFRA]	Infrastructure as Code (Terraform, CloudFormation, CDK)
[CI/CD]	Pipeline configurations (GitHub Actions, GitLab CI, Jenkins)
[DOCKER]	Containerization, Dockerfiles, Docker Compose

Tag	Purpose / Target Area
[K8S]	Kubernetes manifests, Helm charts, cluster setup
[ENV]	Environment variables, config updates, secrets management
[DEPL]	Deployment setups, blue-green strategies, release scripts
[NET]	Networking, DNS, load balancers, CDNs, ingress

Quality Assurance & Testing

Tag	Purpose / Target Area
[TEST]	General test suite changes
[UNIT]	Unit testing (Jest, Vitest, PyTest)
[INTEG]	Integration tests between modules or services
[E2E]	End-to-End testing (Playwright, Cypress)
[LOAD]	Load testing, stress testing, performance benchmarking
[MOCK]	Test data generation, mocks, stubs, fixtures

Security, Compliance & Observability

Tag	Purpose / Target Area
[SEC]	Vulnerability patching, security hardening, dependency fixes

Tag	Purpose / Target Area
[AUDIT]	Compliance requirements (GDPR, SOC2, HIPAA, audit logging)
[OBS]	Observability, telemetry setup (OpenTelemetry, Datadog)
[LOGS]	Log handling, structured logging, ELK stack
[METRICS]	Application metrics, Prometheus counters, Grafana dashboards

Architecture & Maintenance

Tag	Purpose / Target Area
[ARCH]	System architecture, ADRs (Architecture Decision Records)
[SPIKE]	Timeboxed research, technical exploration
[POC]	Proof of Concept implementations
[REFACTOR]	Code cleanup, restructuring without changing functionality
[DEBT]	Explicit technical debt resolution
[BUG]	Bug fixes, unexpected defect resolutions
[HOTFIX]	Urgent production patches
[PERF]	Performance optimizations, memory leak fixes
[DEPS]	Dependency updates, package upgrades

Tooling, DX & Documentation

Tag	Purpose / Target Area
[DOCS]	Code documentation, READMEs, developer guides
[API-DOCS]	OpenAPI, Swagger, Postman collection updates
[DX]	Developer experience enhancements, local dev tools
[LINT]	Formatting, linters, static analysis rules
[BUILD]	Bundlers, compilers, build tool configurations (Vite, Webpack)
[RELEASE]	Release notes, changelog updates, version tagging

AI & Data Science (Modern Stack)

Tag	Purpose / Target Area
[AI]	Artificial intelligence, model integrations
[LLM]	Prompt engineering, context window handling, vector stores
[RAG]	Retrieval-Augmented Generation context systems
[DATA]	Training dataset preparation, data cleaning
